

Manish Kumar Kushwaha

Backend Software Engineer | Java, Spring Boot, Spark

Bengaluru, India • tzmanish97@gmail.com • +91 9456522346 • linkedin.com/in/tzman • github.com/tzmanish

Backend Software Engineer with 5+ years' experience in large-scale, compliance-critical financial systems. Proven mentor and cost optimizer, delivering scalable, secure, and high-performance reporting platforms in regulated domains.

PROFESSIONAL EXPERIENCE

Societe Generale (SG GSC), Bangalore

Mar 2020 - Present

Specialist Software Engineer

- Serving on the principal architect's core team to deliver a multi-year initiative unifying regulatory reporting systems, streamlining logic, ensuring DRR compliance, and scaling processing for 1.7B+ annual reports.
- Led development of an order lifecycle reporting solution with the data engineering team, processing 1M+ trade events daily.
- Reduced runtime (7h → 3h) and lowered cloud costs by 58%, saving €2,000/month by optimizing daily batch processing of data from the central data lake.
- Mentored junior developers in building a reporting application, providing design direction for the configurable query builder, reviewing pull requests, and resolving technical blockers for customized trade lifecycle reporting.

Senior Software Engineer - Java Back-End

- Built a Java-based abstraction layer over the organization's service-oriented archival APIs, hiding low-level requirements (workspace/model/document IDs, client-based authentication) and automating metadata generation. Integrated the service with existing automated reporting workflows to enable seamless archival.
- Delivered a unified, secure, and user-friendly interface for manual archival and retrieval within the team's existing Angular-based reporting application, leveraging its established access management workflow. Provided role-based access and full audit tracking.
- Implemented data quality controls to ensure accuracy and reliability of reporting outputs.

Software Development Engineer - Full Stack (Java + Angular)

- Developed a self-service interface for parameterized regulatory report generation, integrating SAP BO and Informatica via REST APIs to eliminate manual intervention and increase throughput.
- Optimized Angular load performance by caching user preferences in local storage, reducing redundant API requests, which improved Time to Interactive (TTI) by 15% and lowered server load.

ACADEMIC BACKGROUND

Bachelor's Degree	2020
Indian Institute of Technology (IIT) Roorkee	7.2 CGPA

Higher Secondary (Class 12)	2013 - 14
Jawahar Navodaya Vidyalaya (JNV) Basdei	CBSE 93.4%

Secondary (Class 10)	2011 - 12
Jawahar Navodaya Vidyalaya (JNV) Basdei	CBSE 9.4 CGPA

SKILLS

Programming	Java, Spring Boot, Python, JavaScript/Typescript
Data management	MySQL, Hive QL, Spark, Hadoop, Airflow
Cloud & DevOps	Azure AKS, Azure HDInsight, Docker, Kubernetes, Git

PROJECTS

Shivganga, Jhabua

Dec 2022 - Dec 2023

Online Donation Platform with Administration Dashboard

Tech Stack: Angular, Spring Boot, MySQL, Nginx

- Delivered donation platform increasing engagement by 47% for nonprofit Shivganga.
- Engineered end-to-end payment integration using Razorpay, implemented robust REST APIs with JWT-based authentication.
- Configured and deployed on a dedicated Unix-based VPS with Nginx reverse proxy, delivering improved performance.

CERTIFICATIONS & AWARDS

Societe Generale

Q4 2024

Spot Award for implementation of robust data quality controls

SpringPeople

Jan 2024

Docker and Kubernetes ATP

SG Cloud Platform Extended Professional Services

Aug 2023

Cloud Developer and DevOps Expert Level

Societe Generale

Q2 2023

Star of the Quarter for demonstrating strong ownership and swift learning agility

Societe Generale

Q1 2023

Spot Award for exceptional Azure cost optimization
